

INCIDENT MANAGEMENT SYSTEM: EMPOWERING SMART CITIES

A comprehensive solution designed to streamline incident reporting, management, and response in urban areas.

HOW IT WORKS: A QUICK OVERVIEW

Report

Incidents are reported through a user-friendly Incident Creation Form

Alert

Automated alerts notify the appropriate response team based on incident type and location

Action

Response teams review and act on incidents, with real-time updates sent to administrators

KEY FEATURES

COMPLETE INCIDENT REPORT				
Name	Date Created	Incident Type	Severity	Status
b test a2	Apr 26th, 2024 2:07 PM	Option B	1	Closed
alert c2	Apr 26th, 2024 10:33 AM	Option B	1	Closed
alert ctest	Apr 26th, 2024 10:30 AM	Option B	2	Active
test aa2	Apr 26th, 2024 10:25 AM	Option A	2	Closed
alert test a11	Apr 26th, 2024 10:15 AM	Option A	2	Active
test A6	Apr 26th, 2024 10:12 AM	Option A	3	Closed

Dynamic Incident Forms

Customizable forms tailored to various incident types

Automated Alerts

Instant notifications ensure rapid response times

Admin Oversight

Admins have a view of all incidents & actions taken

User-Centric Dashboard

A central dashboard displays relevant incidents, along with actionable options

Review & Analysis

Dedicated pages for in-depth review & analysis of each incident by team members

BENEFITS

Efficiency

Faster response times to incidents

Flexibility

Adaptable to any scale of city or specific client needs

Clarity

Clear, organized management of incident data

Innovation

Future updates to enhance further client needs
