

Managing employee training and certification expiry dates becomes increasingly difficult as educational institutions grow. Manual tracking introduces errors, missed deadlines, and compliance risks.

The Education Training and Certification Reminder solution automates monitoring and communication, ensuring staff maintain required training while reducing administrative workload.

Centralized Staff Database

All employee records, training requirements, and completion dates are centralized for easy access and management

Expiry Tracking

The system monitors certification and training timelines, identifying upcoming expiries without manual oversight

Scheduled Reminders

Staff receive reminders based on predefined timelines, such as weeks or days before expiry, reducing missed renewals

Automated Notifications

Once templates and timelines are set, the system automatically pulls staff data and sends reminders without manual intervention

Training Completion

Staff can confirm completed training by responding to reminder messages, keeping records accurate and up to date

SMART EDUCATION: THE FUTURE OF LEARNING
