

Universities often receive a high volume of applications when positions open, making it difficult for hiring managers to sort, track, and manage candidates efficiently. Manual review processes are time-consuming and increase the risk of delays and inconsistencies.

SimplyCast's Open Position Application solution automates application intake, sorting, and communication, helping institutions manage hiring more efficiently.

Digital Application Forms

Applicants submit required information through an online form, including resumes, CVs, and supporting documents.

Applicant Sorting

Applications are automatically filtered based on predefined criteria, removing candidates who do not meet role requirements.

Tracking Pipeline

All applicants move through a visible pipeline that shows each stage of the hiring process, from submission to interview.

Applicant Communication

Applicants are automatically notified when they progress or are declined, reducing manual follow-up for hiring teams.

Secure Record Management

All application data is stored securely, maintaining a complete record of applicants throughout the hiring cycle.
