

Educational institutions offer many online courses to help employees build skills and earn certifications. Tracking participant progress manually through emails, texts, or calls is time-consuming and prone to errors.

SimplyCast's Course Progression solution automates registration, tracking, and communication so administrators can clearly see who is on track, who needs support, and who has completed training.

Course Registration Forms

Participants register for courses through digital forms, automatically placing them into a course progression pipeline.

Instructor Updates

Instructors submit grades, credentials, or milestones through forms that update participant records in real time.

Progression Pipelines

Participants move through defined stages that show course status and progression at a glance.

Progress Notifications

Participants receive updates and reminders based on milestones and important course events.

Final Results Distribution

Final grades or pass/fail results are automatically sent to both administrators and participants.

SMART EDUCATION: THE FUTURE OF LEARNING
