

Annual General Meetings in educational institutions often involve large numbers of participants, making registration, access, and communication difficult to manage manually. Coordinating invites, reminders, and meeting access can lead to errors and accessibility challenges.

SimplyCast's AGM Management solution centralizes participant information and automates communication to ensure meetings run smoothly with minimal manual effort.

Online Registration

Stakeholders register for the AGM through a digital form that collects participant details and stores them in a centralized database.

Automated Confirmations

Participants receive immediate confirmation messages that include meeting details, agendas, and instructions for joining.

Personalized Reminders

Automated reminders are sent before the meeting using participant information to ensure attendance and preparedness.

Automated Meeting Access

At meeting start time, participants receive instructions to join by dialing in or through automated call-out options.

Live Analytics & Feedback

Real-time analytics track participation during the meeting, with detailed reports and automated feedback forms available afterward.

SMART EDUCATION: THE FUTURE OF LEARNING
